

AMENDMENTS TO THE SPECIFICATION

In the specification of the present invention, please replace the paragraph beginning on page 5 at line 5 with the following new paragraph:

In some embodiments of the invention, the location message can include information about the media file, including but not limited to a title of the media file, a date stamp of the media file, a time stamp of the media file, a copyright indication for the media file, a preview of the media file, or one or more text fields.

In the specification of the present invention, please replace the paragraph beginning on page 12 at line 1 with the following new paragraph:

Figure 2 is a figurative data structure diagram of a location message 200, according to one embodiment of the invention. In this embodiment, location message 200 comprises headers 240, descriptive information 250 and handle 260 to media file or files 230. Each media file 230 can include but is not limited to: a video clip, an audio/video clip, a two dimensional image, a three dimensional image, a text document, a data file, an application program or a compressed archive. Descriptive information 250 can include but is not limited to: a title of the media file, a title of the video clip, or of both; a time or date stamp for the media file, for the video clip, or for both; a message from the sender of the media file to its recipient (in the form of text, for example), or information describing the video clip (who, what, when, where or why, for example). Location message 200 may also include a preview of the media file.
